

# ICON HEIGHT DIMENSIONS

## NOTES:

To calculate upper bunk head space, take **your ceiling height** and subtract  **$67\frac{1}{4}"$** .  **$10"$  thick mattresses** are recommended both to provide ample head space and to ensure that **safety rails are  $6\frac{1}{4}"$  above the mattress** to meet Consumer Safety Requirements. **Using a mattress larger than the recommended  $10"$  mattress shown will reduce head space.**
